MemreMi

Your smart agenda assistant you can talk to

User manual · version 1.0.18

English & Dutch · works offline · for Android (iOS coming later)

1. What is MemreMi?

MemreMi is an agenda app you can simply talk to. Say what you need to do and MemreMi puts it in your agenda, sets a real alarm, makes your shopping list and helps you on your way with route and weather. Everything stays on your own phone, so a lot works without internet and your data stays private.

Why MemreMi? Other agenda apps make you type. MemreMi understands natural speech ("in 2 hours", "at half past two", "this afternoon"). It has a real alarm with big buttons and your own song, and it combines appointments, shifts, medication and groceries in one app.

2. Who is MemreMi for?

Who	What for
👷 Shift workers	roster with early, late and night shifts, with an alarm per shift
🩺 Care workers & carers	appointments, routes to clients, medication moments
👵 Seniors	talk instead of type, big alarm buttons, clear reminders
👨‍👩‍👧 Families & busy people	shopping list with prices, school, sports, birthdays
🧠 People who forget things easily	MemreMi reminds you at the moment you choose, with your own sound

🌍 Dutch speakers	the whole app and the voice also work in Dutch

3. What can you use MemreMi for?

- 📅 **Appointments**: dentist, doctor, hairdresser, work, school, sports, birthdays
- ⏰ **Real alarm**: also when the app is closed, on your lock screen, with your own MP3
- 🗓️ **Work roster**: enter your shifts and get reminded in advance
- 💊 **Health**: medication, meals and drinking water as daily routines
- 🛒 **Groceries**: speak your list, with prices, a total and a tip where it is cheaper
- 🚲 **Route & weather**: choose car, bike, walking or public transport and get a weather tip
- 🎬 **Videos**: keep useful clips (recipes, exercises) together
- 🌞 **Morning briefing**: every morning what is planned today, with the weather

4. Getting started (first time)

1. Install MemreMi from Google Play and open it.
2. Answer the short questions: your name, home town, work, how you travel, what time you get up. Optional questions can be skipped.
3. Allow **notifications**, the **microphone** and **exact alarms**. Without them the alarm cannot ring.
4. Go to **Settings** → **Alarm sound**. Do you see "⚠️ … Tap here"? Tap it and switch it on.
5. Turn up your phone's **alarm volume** (this is a different volume than notifications).
6. Test: tap 🔔 **Test alarm**. It rings after 10 seconds.

At the bottom you see the tabs: **Agenda · Groceries · Week · Roster · Health · Videos · Settings**.

5. Talking to MemreMi

In the Agenda, tap 🎤 and just talk. MemreMi answers in a chat bubble and with a calm voice. You can also type.

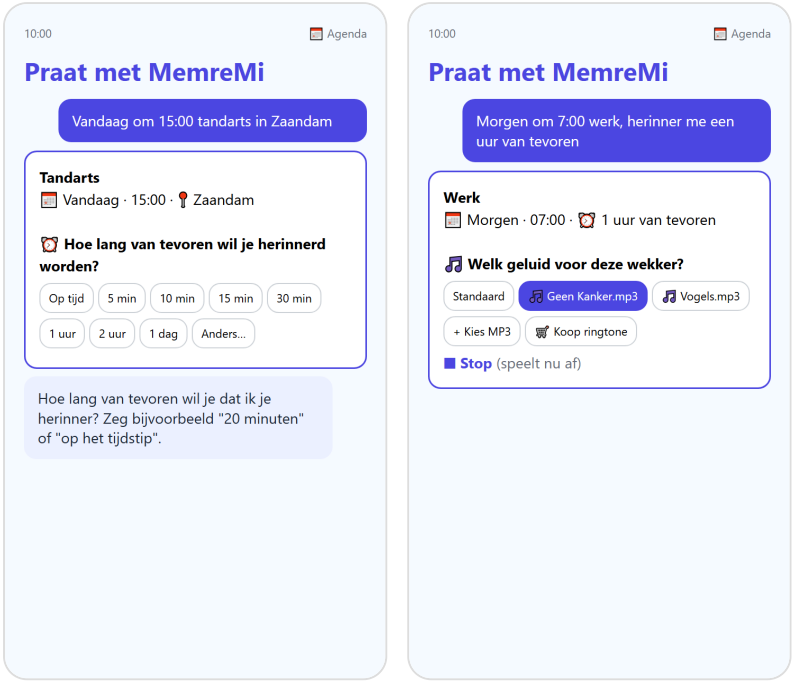

You say	MemreMi does
tomorrow at 10 dentist in Zaandam	creates an appointment (you see a card first)
I have an appointment in 2 hours today	sets it today, 2 hours from now
this afternoon at half past two hairdresser	today at 14:30
what's on tomorrow? / this week?	lists your appointments
what is my next appointment?	names the next one
when am I free?	finds your first free day
move it to Friday	moves the appointment you just talked about
delete the dentist → undo	deletes, and can put it back
what's the weather tomorrow?	gives the weather in your town

On the card, say yes to save or no to cancel.

6. Appointments, reminders and your own sound

1. Speak or type your appointment. A card appears.
2. **Repeat:** once, daily, weekly or yearly.
3. ⏰ **How long in advance?** On time, 5, 10, 15 or 30 min, 1 hour, 2 hours, 1 day or "Other...". You can also say it: `remind me 20 minutes before`.
4. 🎵 **Which sound?** Default, an MP3 you picked before, **+ Choose MP3** or 🛒 **Buy ringtone**. ▶ Listen plays it, ■ Stop stops it.
5. Say `yes` or tap Save.

Every appointment has buttons: **Edit** (time, duration, place, reminder, sound), ⏰ **Also in Clock app**, **Share** and **Delete**. If two appointments clash, MemreMi warns you.

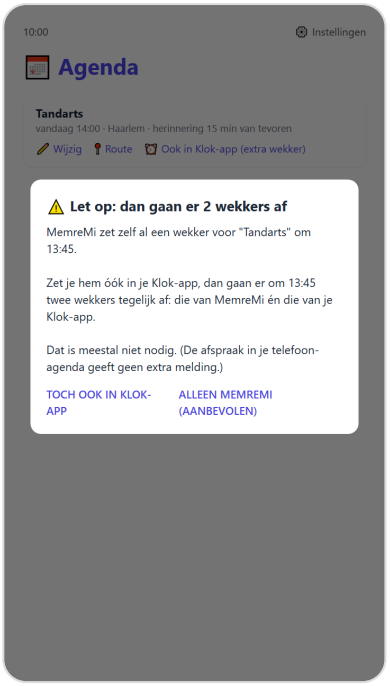

7. The alarm

At the chosen moment MemreMi rings like a real alarm clock: loud on the alarm volume, your song on repeat, and your phone vibrates. Also when the app is closed, the phone is locked or was just restarted.

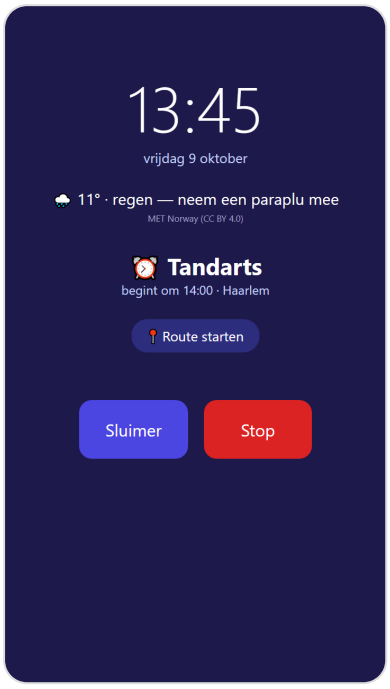

- The big alarm screen appears over your lock screen with time, date, weather, your appointment, the address and the song.
- 😴 **Snooze** = again in 5 minutes · ■ **Stop** = off. After 3 minutes it stops by itself.
- 📍 **Start route** stops the alarm and opens the route with your chosen transport.
- A grocery alarm shows your whole list with prices.

Big alarm screen while using your phone: go to Settings → Alarm sound, tap "Alarm also full screen…" and allow **Display over other apps**. The pop-up with Stop and Snooze is always there too.

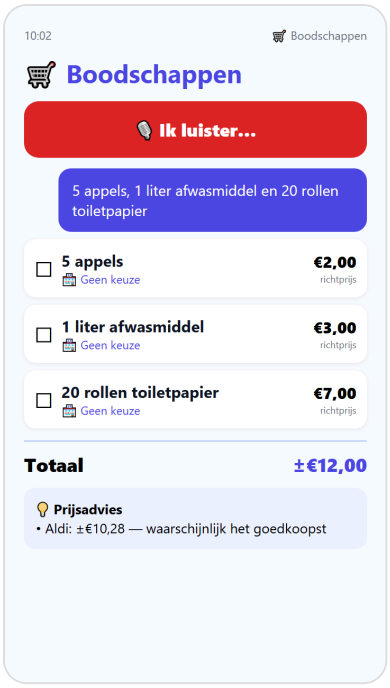

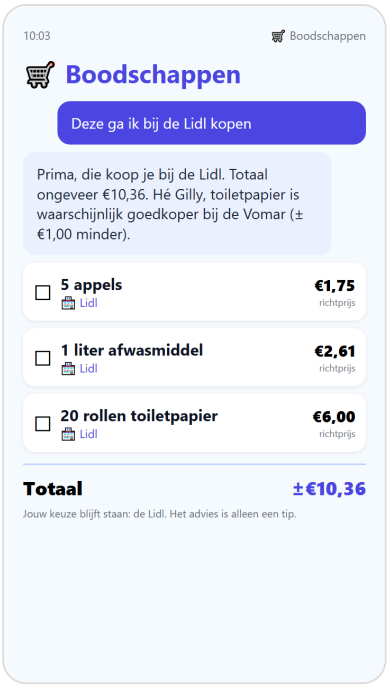

8. 🛒 Groceries

1. Open the Groceries tab and tap 🎤 **Speak**, e.g. 5 apples, 1 litre of dish soap and 20 rolls of toilet paper.
2. You get a list with a price per product and the **total** at the bottom.
3. **Choose a shop** by voice (I'll buy these at Lidl) or with 🏪. If something is cheaper elsewhere, MemreMi gives you a tip.

4. Tap a price to enter the real price; MemreMi remembers it per shop. Tap ☐ when bought.
5. ⏰ **Grocery alarm:** pick today or tomorrow, the time, how long in advance and the sound.

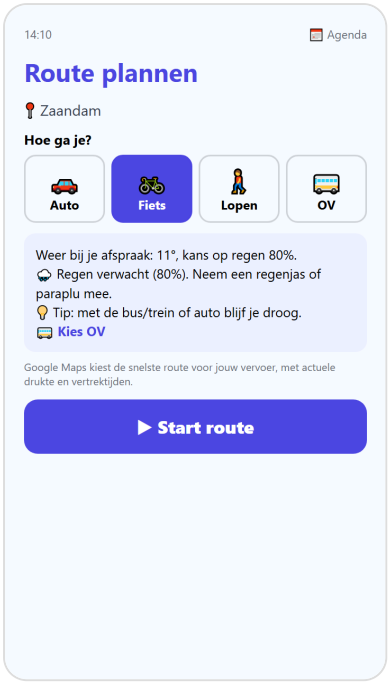

Prices are **estimates**, not live shop prices. Enter the real price when you know it.

9. 🚲 Route and weather

1. Tap 📍 on an appointment.
2. Choose 🚗 **Car** · 🚲 **Bike** · 🚶 **Walk** · 🚌 **Public transport**.
3. You see the weather at your appointment with a tip (rain and you cycle? take a rain jacket or the bus).
4. Tap ▶ **Start route**: Google Maps opens the fastest route for your transport.

10. Roster, health, week and videos

- **Roster:** enter your shifts (early, late, night, day) and get a reminder in advance.
- **Health:** daily routines like medication at 08:00 or lunch at 12:30, each with an on/off switch.
- **Week:** your whole week on one screen.
- **Videos:** save useful YouTube links.

11. Settings

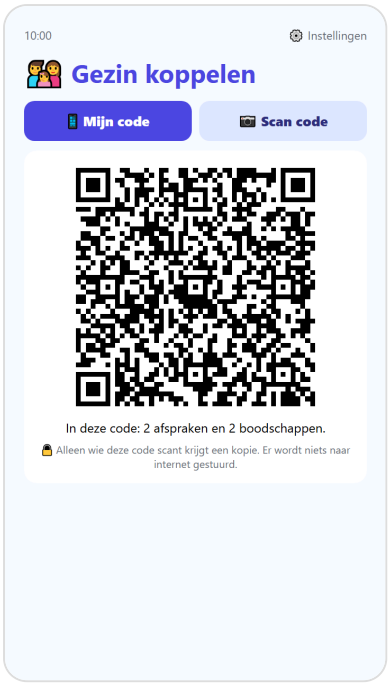

Setting	What it does
Language	English or Nederlands, for the whole app and the voice
Alarm sound	your default MP3, ▶ Listen/■ Stop, 🔔 Test alarm, 🛒 Buy ringtone
Advice & voice	tips, weather, traffic and read-aloud on or off; male or female voice

Offline speech	talk without internet (one-time download of about 75 MB)
Morning briefing	your day and the weather every morning
Theme	app colour: purple, pink, blue or green
Premium	unlimited appointments (the free version has 15); see chapter 13

12. 👨‍👩‍👧 Family sharing (QR code)

1. Go to Settings → **Family sharing**.
2. Tap **My code**: a QR code with your upcoming appointments and open groceries appears.
3. Your family member taps **Scan code** in their MemreMi and points the camera at your screen.
4. They tap **Add to my MemreMi**. Alarms are set right away; duplicates are skipped.

> It is a copy, not a live link. If something changes, share a new code.

13. ⭐ Subscriptions

Plan	Price	What you get
MemreMi Free	€0	up to 15 appointments/shifts, basic agenda, basic alarm, try out voice
MemreMi Premium	€2.99 per month or €24.99 per year	unlimited appointments and shifts, all alarm features, own MP3 sounds, full routines, extended voice, no ads
MemreMi Family	€4.99 per month (coming soon)	shared agenda, shared groceries, reminders for family members, caregiving

14. Troubleshooting

Problem	Solution
The alarm does not ring	Settings → Alarm sound → tap "⚠ … Tap here" and allow exact alarms. Also check that notifications are on.
No sound	turn up the **alarm** volume (not the notification volume)
No big alarm screen	phone Settings → Apps → MemreMi → allow "Show on lock screen" / "Pop-ups"
The microphone doesn't understand me	speak calmly, or switch on Offline speech
No weather tip	this needs internet; the alarm and route still work

15. Privacy

Weather: the place of your appointment is looked up at PDOK (Dutch government), then the weather is fetched from MET Norway with rounded coordinates only. No name or account is sent. Source: MET Norway (CC BY 4.0).

Your appointments, lists and settings are stored only on your own phone. MemreMi uses no account and sells no data. Privacy policy: mrgental.com/privacy-memremi

Tip: ask MemreMi what can you do? and it explains itself.
